

HEALTH, SAFETY AND ENVIRONMENT

POLICY

Our Vision

Fintran is committed to providing workplaces free from harm to people and the environment, and stimulating a workplace culture which drives this outcome.

To achieve this, senior management will:

- Provide and maintain workplaces and working conditions that are both safe and healthy;
- Implement strategies to protect the environment by minimising pollution and waste effectively; using resources efficiently; and complying with government reporting and notification obligations;
- Proactively pursue the elimination of hazards and the reduction of any risks that are present to as low as is reasonably practicable;
- Continuously improve our health, safety and environmental (HSE) Management Systems and their outcomes;
- Meet all legal and other requirements, and the expectations of our regulators and clients;
- Consult with and promote active participation of employees in the management of their own health, wellbeing and safety, and the health and safety of others;
- Identify and set HSE objectives annually, and measure performance against them;
- Ensure this policy is communicated, both within the organisation and to interested external parties.

This policy provides the foundation of all our HSE management activities.
